**KOCH MEMBRANE SYSTEMS SELECTED FOR LARGEST RECYCLED
WATER PROJECT IN AUSTRALIA**

Reverse Osmosis System Selected for Municipal Wastewater Reuse in City of Brisbane

Wilmington, Mass. – Koch Membrane Systems (KMS) has been awarded a multi-million dollar contract to provide a reverse osmosis (RO) system for municipal effluent reuse in Australia.

Bundamba AWT Plant Stage 1A, the first of four projects that make-up the Western Corridor Wastewater Recycle Project, was awarded to Thiess Black & Veatch joint venture by the Queensland state government. The Thiess Black & Veatch joint venture selected a two-pass, four-train MegaMagnum[®] RO system from Koch Membrane Systems for the fast-track first phase of the water reclamation initiative, which, when completed, will treat up to 65 MGD (245 MLD).

“It is exciting to have received this order for a large-scale MegaMagnum system,” remarked Dr. Nick Powell, vice president of KMS’ water and wastewater business. “The award of Bundamba Stage 1A is a great endorsement of the technology from one of the world’s leading engineering firms.”

Intended to recycle municipal effluent from Brisbane and Ipswich, the Bundamba Stage 1A project will supply the Swanbank power station. The system is scheduled for delivery in May/June of 2007.

This project is one of several for which MegaMagnum RO systems have recently been awarded to KMS.

About Koch Membrane Systems

Koch Membrane Systems, Inc. has been a global leader in separation and filtration products for more than 30 years. A designer and manufacturer of state-of-the-art membrane cartridges and elements, as well as complete membrane systems, KMS products are specified for the most demanding applications. In addition to chemicals that enhance membrane performance, KMS provides a wide range of maintenance and technical service programs. The company has supplied membranes for more than 15,000 systems installed around the world, serving the food processing, life sciences, and general manufacturing industries, as well as providing potable water and wastewater treatment technologies for communities of all sizes.

Headquartered in Wilmington, Massachusetts, Koch Membrane Systems is a Koch Chemical Technology Group, LLC company. For more information on Koch Membrane Systems and its full line of membranes and accessory products, visit www.kochmembrane.com, call 1-888-677-5624 or write to info@kochmembrane.com.
